ASSEMBLY INSTRUCTIONS

Before you start the assembly, you should thoroughly wash and disinfect your hands and the components of the Face shield.

- **There is a protective film** on the shield visor
- The film on the inside should be peeled off before assembly
- The protective film on the outside can be peeled off after assembly
- Use the holes in the headband to adjust the size of the shield to fit your head
- All materials of the Face Shield allow it to be disinfected with alcohol-based disinfectants
- High temperature use should be avoided due to possible deformation
- For disinfection, **use soft materials** that do not scratch the visor surface
